DETAILED ACTION

1.

Claims 1-16 are pending in this application filed August 21, 2003.

Applicant's claims are directed toward stabilized photoprotective compositions.

Claim Rejections - 35 USC § 102

2.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Cole et al. USP 6,444,195 B1.

Cole et al disclose a method of photostabilizing a composition comprising one or more dibenzoylmethane derivative such as avobenzene or Parsol 1789. In column 3, Cole discloses that the derivative is present in an amount from about 0.1% to about 20% by weight of the composition. Cole further discloses a method of protecting mammalian skin or hair from UV radiation comprising topically applying to the skin or hair such a composition. In column 4, lines 38-65 Cole further discloses that absorbing/reflecting agents such as phenylbenzimidazole sulfonic acid and zinc oxide are also present in concentrations from about 0.1% to about 30% by weight of the composition. Although Cole does not specifically identify phenylbenzimidazole sulfonic acid as a stabilizer, it is the Examiner's position that the presence of said compound in the same amounts and proportion claimed by applicant

are sufficient to act as a stabilizer without it being specifically stated by the reference. Additionally, applicant is claiming a composition and statements of intended use are of not patentable distinction and carry no weight. Lastly, in column 6, line 1-10 Cole discloses that the composition may be in many forms, specifically an emulsion. Cole discloses each and every aspect of the invention as claimed by applicant in the instant case.

Information Disclosure Statement

4.

The information disclosure statement (IDS) submitted on August 21, 2003 was noted and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement and made it of record.
